

Assignment no : 4

Name : Omkar Pokalwar

Div : G (G4)

Roll No : 779

PRN No : 202201070109

Problem Statement :-

Read any real-life dataset. Store the data in Data Frames. Identify 10 grains for the given dataset.

Implement all 20 grains using Pandas methods. The Sample Grains for the Sales Dataset are as:

1. Which was the best month for sales? How much was earned that month?
2. Which product sold the most? Why do you think it did?
3. Which city sold the most products?
4. What Products are most often sold together?

Solution :-

```
import pandas as pd
df=pd.read_csv("/content/sample_data/Grainsales.csv")
df
```
